Operational Guide Of AANI QR Transaction

CONTENTS

Objective

Terminal Functionality

Transaction Types

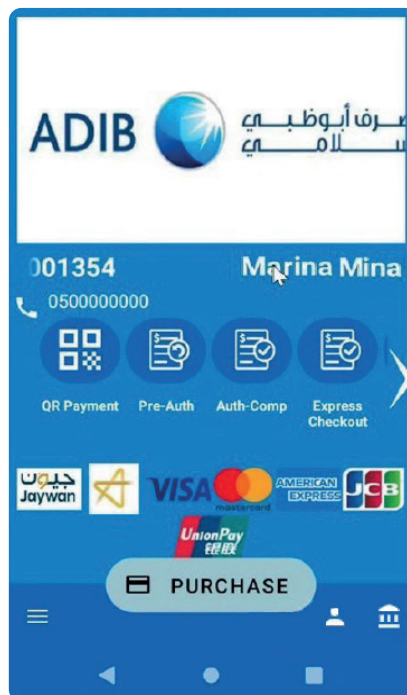

Objective

This document provides operational guidelines to make Aani QR payments on your POS terminal. It outlines the supported transaction types and explains the working flow, supplemented with relevant screenshots for clarity.

Terminal Functionality:

I. Home Screen & QR Payment

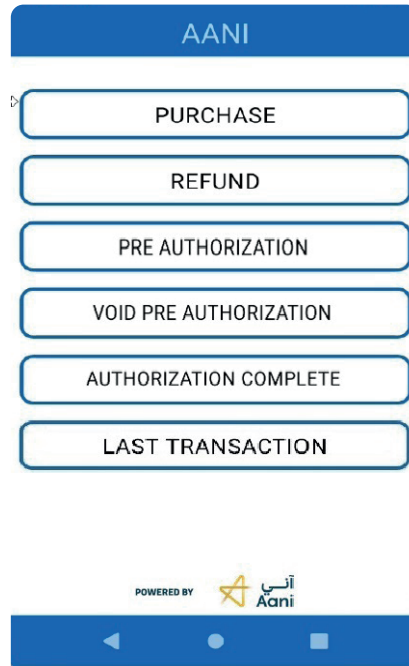

Refer to the attached screenshot showing the home screen with QR Payment options.

II. Select AANI option on the Scan & Pay screen as shown below. Click on QR Payment Icon :

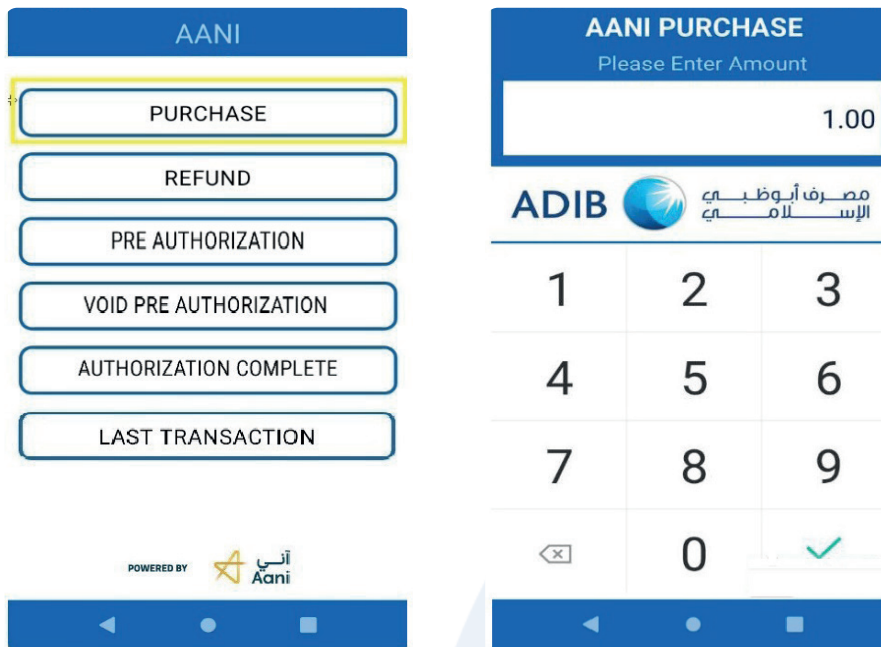

III. Select Transaction Type: Choose the desired transaction type from Aani menu list.

Transaction Types

I. PURCHASE

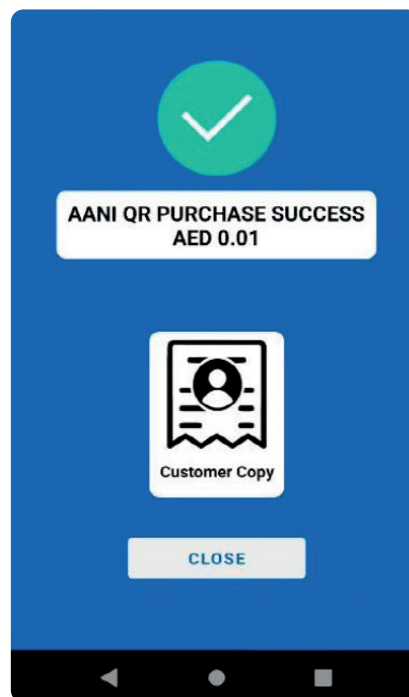

Initiate a purchase transaction by selecting the PURCHASE button (screenshot below)

Enter the transaction amount and select Tick mark to proceed with the payment, a Dynamic QR code will be generated and displayed on the screen.

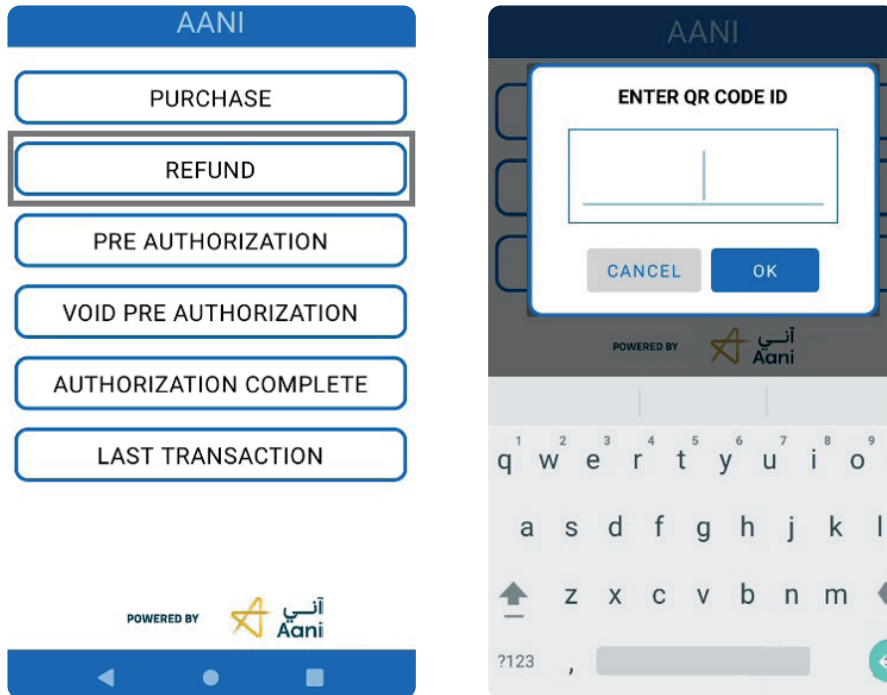

- Customer to scan the QR code on their individual Aani application
- Transaction Approval screen will be displayed as shown below.

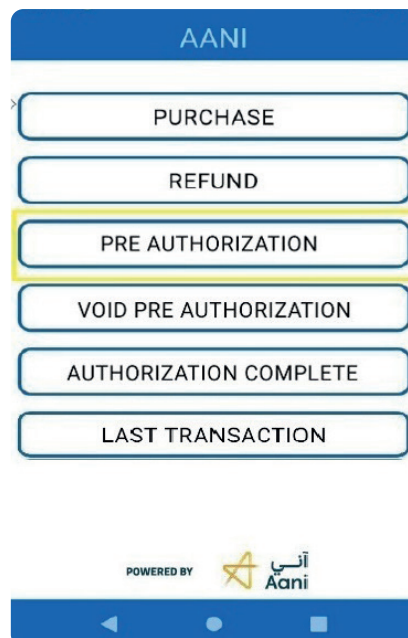

II. REFUND

To perform a Refund transaction, "QR CODE ID" of the original transaction is required as shown below.

III. PRE AUTHORIZATION

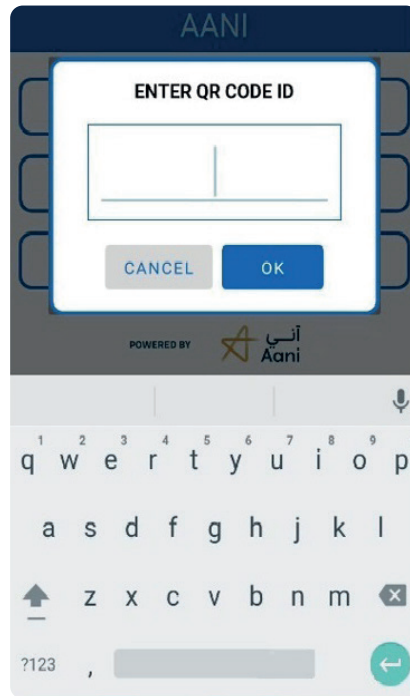

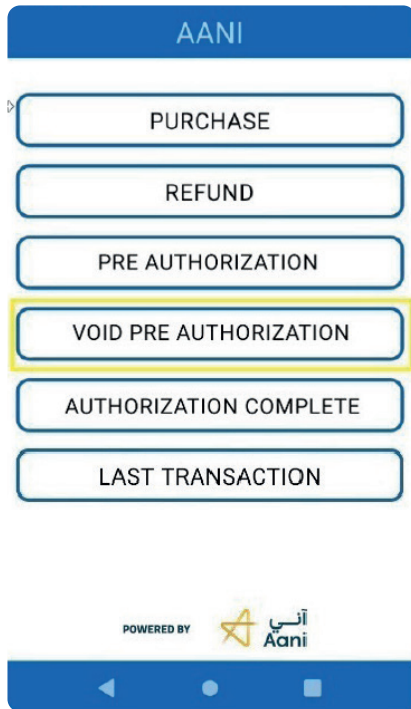

To perform a Pre Authorization transaction, click the Pre-Authorization option and enter the required amount.

*Applicable only in case of Pre Auth Enabled

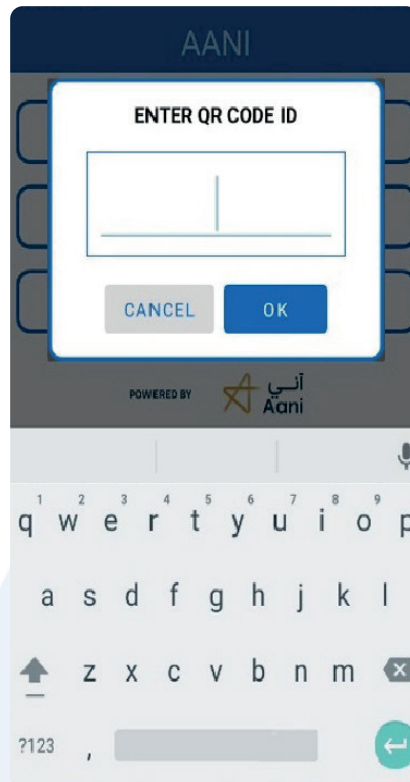

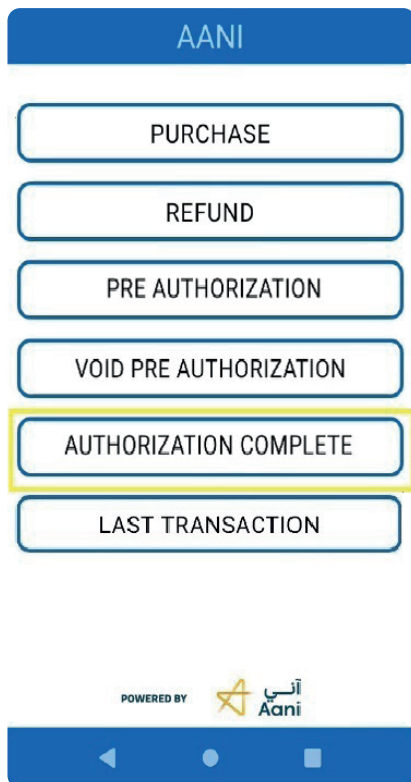

IV. VOID PRE AUTHORIZATION

To perform the VOID of Pre Authorization transaction, "QR CODE ID" of the original transaction is required as shown below

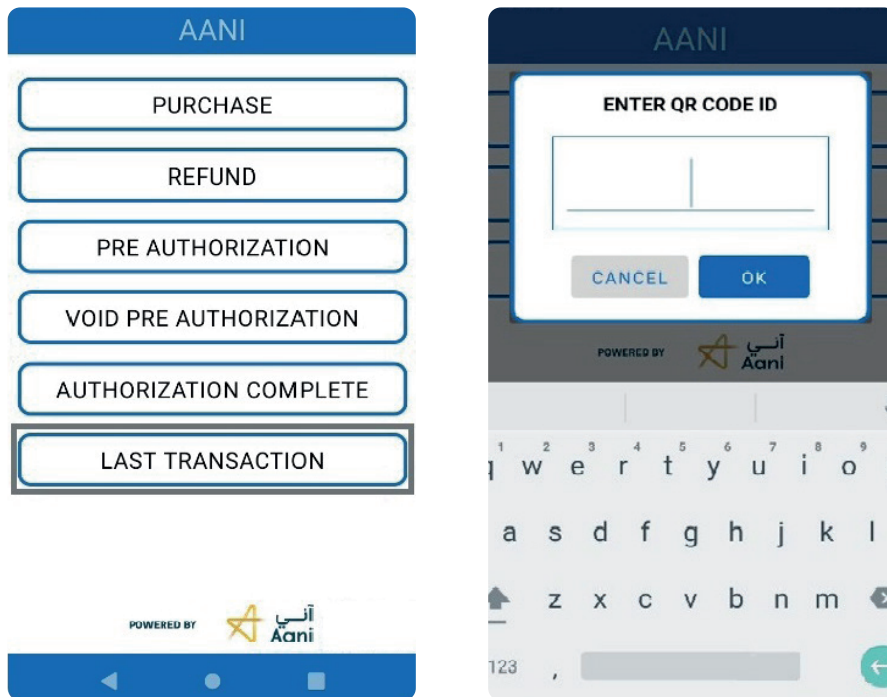

V. AUTHORIZATION COMPLETE

To perform the Authorization Complete transaction, QR Code ID of the original Pre Authorization transaction is required as shown below.

VI. LAST TRANSACTION

QR CODE ID of the original transaction is required from the merchant receipt and the transaction history section on the terminal.
